

## SQL Murder Mystery Log

```
1. SELECT *  
   FROM crime_scene_report  
   WHERE type = 'murder'  
   AND city = 'SQL City'  
   AND date = 20180115;
```

This is the first place I looked in the database to get as much information as I could about

|          |        |                                                                                                                                                                                           |          |
|----------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 20180115 | murder | Security footage shows that there were 2 witnesses. The first witness lives at the last house on "Northwestern Dr". The second witness, named Annabel, lives somewhere on "Franklin Ave". | SQL City |
|----------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|

what happened.

```
2. SELECT *  
   FROM person  
   WHERE address_street_name = 'Northwestern Dr'  
   ORDER BY address_number DESC;
```

This gives me the last house on Northwestern Dr. which is 4919 and belongs to Morty Schapiro

```
3. SELECT *  
   FROM person  
   WHERE name LIKE 'Annabel%'  
   AND address_street_name = 'Franklin Ave';
```

This gives me the address for the other witness:

|       |                |        |     |              |           |
|-------|----------------|--------|-----|--------------|-----------|
| 16371 | Annabel Miller | 490173 | 103 | Franklin Ave | 318771143 |
|-------|----------------|--------|-----|--------------|-----------|

```

3. SELECT *
   FROM interview
   WHERE person_id IN (14887, 16371);

```

|       |                                                                                                                                                                                                                  |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14887 | I heard a gunshot and then saw a man run out. He had a "Get Fit Now Gym" bag. The membership n<br>bag started with "48Z". Only gold members have those bags. The man got into a car with a plate that<br>"H42W". |
| 16371 | I saw the murder happen, and I recognized the killer from my gym when I was working out last week<br>9th.                                                                                                        |

This gives me the witness statements which gives me an eyewitness account and gave me a description.

```

4. SELECT *
   FROM get_fit_now_member
   WHERE membership_status = 'gold'
   AND id LIKE '48Z%';

```

Gives me the memberships that contain the clue "48Z"

|       |       |               |          |      |
|-------|-------|---------------|----------|------|
| 48Z7A | 28819 | Joe Germuska  | 20160305 | gold |
| 48Z55 | 67318 | Jeremy Bowers | 20160101 | gold |

```

5. SELECT *
   FROM person p
   JOIN get_fit_now_member g
   ON p.id = g.person_id
   WHERE g.membership_status = 'gold'
   AND g.id LIKE '48Z%';

```

| id    | name         | license_id | address_number | address_street_name | ssn       | id    | pe  |
|-------|--------------|------------|----------------|---------------------|-----------|-------|-----|
| 28819 | Joe Germuska | 173289     | 111            | Fisk Rd             | 138909730 | 48Z7A | 288 |

| id    | name          | license_id | address_number | address_street_name   | ssn       | id    | pe  |
|-------|---------------|------------|----------------|-----------------------|-----------|-------|-----|
| 67318 | Jeremy Bowers | 423327     | 530            | Washington Pl, Apt 3A | 871539279 | 48Z55 | 673 |

This gives me the customers who are members of the gym during there time off or on off days

```
6. SELECT *
   FROM drivers_license
   WHERE plate_number LIKE '%H42W%';
```

| id     | age | height | eye_color | hair_color | gender | plate_number | car_make  | car_model |
|--------|-----|--------|-----------|------------|--------|--------------|-----------|-----------|
| 183779 | 21  | 65     | blue      | blonde     | female | H42W0X       | Toyota    | Prius     |
| 423327 | 30  | 70     | brown     | brown      | male   | 0H42W2       | Chevrolet | Spark LS  |
| 664760 | 21  | 71     | black     | black      | male   | 4H42WR       | Nissan    | Altima    |

Gives me a print out of people who have a vehicle with H2W in the plate

```
7. SELECT p.name, dl.plate_number, g.id
   FROM person p
   JOIN drivers_license dl
   ON p.license_id = dl.id
   JOIN get_fit_now_member g
   ON p.id = g.person_id
   WHERE g.membership_status = 'gold'
   AND g.id LIKE '48Z%'
   AND dl.plate_number LIKE '%H42W%';
```

| name          | plate_number | id    |
|---------------|--------------|-------|
| Jeremy Bowers | 0H42W2       | 48Z55 |

And combining everything I have learned gives me the answer of Jeremy Bowers

```
8. SELECT *
   FROM interview
   WHERE person_id = 67318;
```

```
9. SELECT p.name, dl.gender, dl.hair_color, dl.car_make, dl.car_model
   FROM person p
   JOIN drivers_license dl
   ON p.license_id = dl.id
   WHERE dl.gender = 'female'
   AND dl.hair_color = 'red'
   AND dl.car_make = 'Tesla'
   AND dl.car_model = 'Model S';
```

After reading Jeremy Bowers interview, I searched for someone matching all the descriptors he gave of who hired him

```
10. SELECT p.name, COUNT(*) as visits
    FROM person p
    JOIN facebook_event_checkin f
    ON p.id = f.person_id
    WHERE event_name = 'SQL Symphony Concert'
    AND date LIKE '201712%'
    GROUP BY p.name
    HAVING COUNT(*) = 3;
```

Check who was not at the concert!! And we have the mastermind Miranda Priestly

**value**

Congrats, you found the brains behind the murder! Everyone in SQL City hails you as the greatest SQL detective. Time to break out the champagne!
